

5 STEPS FOR A GREENER STAY AT CAMERON HOUSE

Now more than ever it's important to focus on ways in which we can limit our impact on the world around us. Here are 5 simple ways for a greener stay at Cameron House and how you can help us in our commitment to the environment.

1. Green exploration

From walking around our grounds to using our e-bikes to explore the wider area, there are many alternative ways to get about. Check out our walking trails guide. We also offer e-charging stations for electric vehicles too.

2. Eat local, veggie, and vegan

Reduce your carbon footprint by choosing locally sourced produce. Vegetarian and vegan options are a great way to do this as well.

3. Reduce, reuse, and recycle

Using refillable water bottles and saying no to single-use plastics goes a long way to making a real difference. If you do have any rubbish, please make use of our recycling bins around the resort.

4. Green activities

There are a lot of fun and sustainable activities to get involved in here at Cameron House, just ask our activities team for details.

5. Help us conserve energy and water

You can help directly influence our green commitment by helping us to conserve energy and water. Avoiding baths, having shorter showers, and switching appliances off when not in use are small ways that we can make a real difference.
